

The Hanover Bridge

Get Your Compost Site Key!

As of April 1st, Hanover residents will need an access key, or swipe card, to use the St. Michael Compost-Brush Site.

The access key may be picked up at City Hall during regular business hours and is free of charge. Should an access key become lost, please contact the City immediately so that it can be deactivated. Another card will be issued at a cost of \$5.

Another opportunity to pick up an access key will be on May 20th, at the annual Clean Up Day. City Hall will

be open 8 am to Noon that day.

The Compost-Brush site now has 24 hour recorded surveillance. Only residents of St. Michael and Hanover are allowed to use it and are not allowed to give their access key to non-residents. Contractors cannot use the site.

Items that cannot be disposed of at the Compost-Brush Site include pallets, tree stumps, landscape timbers, lumber or construction debris, or household garbage.

Residents will need to remove grass clippings and leaves from their bags and the bags taken home. Planters may be emptied with the containers also being disposed of off-site.

The Krcil family--Kyle, John, and Gavin--was the first to pick up their compost site key!

New Public Works Facility Update

The new public works facility located on 5th Street is progressing.

On November 1, 2016, the City Council awarded a contract to Fehn Companies to complete the soil corrections needed at the future public works facility site. These corrections would bring the site to a corrected sub-grade level. Over the winter months work commenced on the project. Unsuitable materials were removed from the building pad location, the driveway area, parking areas, and rear storage yard area. Fehn Companies then imported clean sand material to compact for an optimum base underneath the facility and pavement areas.

The second focus of this stage of the project was the storm water management system. This required a drainage swale to be created along the south and west property

lines of the property. A large pond was required to be constructed to collect storm water run-off as well. This pond is located in the northeast corner of the property and is a shared pond with the adjacent property. The design of the pond will act as an infiltration system. As water enters the pond area, it will collect and then dissipate into the ground allowing for filtration of toxins.

The next stage of the public works facility project is to advertise for bids for the construction of the structure and installation of the

asphalt driveway and parking areas. This stage will begin in late spring and continue through the summer months with expected completion in late 2017.

Once completed, the facility will house a small office and conference room area, a wash bay for cleaning equipment, a maintenance area to allow equipment repairs to be conducted in house, and an indoor parking area for equipment. The parking area will be large enough to accommodate future growth in Hanover equipment inventory.

Are You Up for the Challenge?

“Nothing equals the excitement when you hear the alarm tones calling you to respond to an emergency: the exhilaration of driving to the fire station to gear up; climbing into the fire engine or rescue truck; the satisfaction of knowing that you may save a life. Become a volunteer with the Hanover Fire Department -- be one of the dedicated men and women who donate their time when your community calls. It truly is the experience of a lifetime! We are always looking for individuals who are committed to making a difference in the community. If you feel you have what it takes to meet the challenges of our business, we would very much like to talk to you. Prior firefighting experience is not required.” Visit www.hanoverfiremn.org for more information and to sign up.

Ballfield Update

The Settlers Park Ballfield Redesign Project is underway. Once completed, a ballfield will have been constructed to allow all levels of softball and baseball to play on one field.

The City has accepted two separate donations to assist with the project costs totaling \$67,000. These donations came from the Hanover Athletic Association and the Hanover Area Youth Ball Organization.

The City will continue to work with both organizations to construct a field to meet the needs of all age groups. One

feature of the field will be multiple locations to place the bases to allow for different distances based on regulations. The project is anticipated to be completed and ready to use in the mid-summer months.

Thank you!

The City of Hanover would like to express thanks to Liz Lindrud, the accountant and deputy clerk for her service to the City. She will be leaving in early April. Council members and staff wish her well in her new position.

Firewood Safety

As you plan your summer vacations, remember that only heat treated firewood can be moved and is free of the emerald ash borer.

The Minnesota Department of Agriculture has certified five firewood producers in Minnesota for heat treatment of firewood. These certified producers are:

- Emily Forest Products
- JN Firewood
- Minnesota Firewood LLC
- Price Firewood
- Sunset Firewood Company

Look for this logo when purchasing firewood:

Do I need a building permit for that?

Most residents realize a building permit is needed for new construction, but the City of Hanover also requires permits for other types of construction and improvement. Here's a list when a permit is needed:

- Building a new home.
- Building a detached garage or accessory building.
- Building an addition to a home.
- Adding a porch or deck.
- Finishing a basement.
- Remodeling that involves changing the structure of the home.
- Residing and reroofing.
- Installing a swimming pool.
- Replacing windows or doors.
- Replacing or installing a furnace or heat source.
- Replacing or installing air conditioning.
- Installing a fireplace.
- Installing an irrigation system.
- Constructing a fence.

Most of the building permits will require a completed application, two copies of the plans, and two copies of the

survey indicating the placement of the project. Some building permits can be issued over-the-counter at City Hall, but most go to Metro West Inspections to be reviewed and fees applied. For a copy of a building permit application visit the City website or call City Hall.

Lions Scholarships

The Hanover Lions Club is excited to offer their annual scholarship program. The program is a great opportunity for area youth to gain assistance in furthering their education. Six scholarships will be awarded each worth \$1,000.

Applicants must live within five miles of Hanover City Hall or have attended Hanover Elementary School or Salem Lutheran School. The deadline for applications is May 27th and recipients will be notified by June 10th.

Applications will be available at these high schools: Buffalo, Rockford, St. Michael-Albertville, West Lutheran, and Watertown-Mayer.

City Goals for 2017-2019

Council members, advisory boards and staff attended a leadership and planning retreat in late March.

During the retreat, six goals were established for 2017-2019 by the group. The goals are:

- The need to foster growth.
- The need to improve staff longevity.
- The need to improve aging infrastructure.
- The need to update the Capital Improvement Plan and its funding.
- The need to maintain financial stability.
- The need to continue maintenance of roads and buildings.

Over the next year, residents will receive more information about each goal and its progression.

Disposal Sites

Hennepin and Wright Counties have hazardous waste disposal sites available for Hanover residents. Residents need to go to the disposal site in the county they live.

Wright County residents may take their hazardous waste to the Compost and Recycling Facility located at 505 County Road 37 NE in Buffalo. Appointments are required and must be made at least one day in advance by calling 763-682-7338. The items are accepted on the second Saturday of the month. Some items do have a fee associated with them. For a complete list of items accepted and the fees, visit www.co.wright.mn.us/162/Compost-Recycling-Facility.

The nearest facility for Hennepin County residents is at 8100 Jefferson Highway in Brooklyn Park. Residents are asked to check the Green Disposal Guide at www.hennepin.us/green-disposal-guide to make sure it will be accepted. There are fees for some items.

Household hazardous waste Disposal guide

Don't throw this stuff in the trash.

All of it poses a threat to people or the environment—or both—if not disposed of properly. Most of these items can be dropped off at your local *household hazardous waste facility* (see info on back). Call about disposal options for the rest.

Household Items

Aerosol products*
 Drain cleaners
 Fire extinguishers
 Mothballs
 Nail polish/remover
 Oven cleaner
 Polish with solvents
 Spot removers
 Thermometers (mercury)

Call for local disposal options

Button batteries
 Batteries (rechargeable)
 Electronics
 Fluorescent lights
 Syringes/sharps

* Note!
 Empty containers, including aerosols, can be disposed of in the trash or be recycled.

Automotive

Recycle Your Aluminum Cans!

The Hanover Lions have a new way to help the community and residents can help!

The Lions Club has built an aluminum can trailer currently located in the parking lot of Chops where area residents may recycle their cans. Please deposit only cans into the trailer, emptying them from any type of container such as a plastic or paper bag.

Once the trailer is full, the cans will be recycled and the Lions Club will **match** the amount. The funds will stay in the community and be used for the need that is the greatest. The Club would like the residents to vote for where the donation will be sent. More information on voting will be provided once the trailer is full.

Are you bee-friendly?

Bee populations are declining throughout the United States, including Minnesota. As a result, organizations are researching and providing education for the general public in order to help save the bees.

The University of Minnesota opened the Bee Lab in late October 2016. The goal of the bee researching facility is to promote the health of bee pollinators. Minnesota is home to almost 400 species of bees. Less than 2 percent of these are honey bees and bumble bees. The others are solitary bees which do not live in a colony with a queen and worker bees.

Bees are unique among other pollinators because they gather large amounts of pollen. Pollen is rich in protein and is the main food source for bees. Pollen can be found in any type of flowering plant including those grown

as crops, in vegetable gardens, or in flower gardens. Pollination by bees provides humans with fruit, vegetables, nuts and flowers.

Helping the bee population is easy! Residents can help by planting bee flowers, providing nesting habitat, and keeping bee flowers “clean”—free of pesticides.

Bee flowers provide both nectar and pollen for bees. The nectar provides them with carbohydrates and is converted in to honey. The pollen provides protein to feed their young.

Common bee flowers that may already be in your garden include purple and yellow coneflower, blue lobelia, milkweed,

sunflowers, Autumn joy sedum, and oregano. Other flowers easily grown are shown below. A list of flowers attractive to bees can be found on the website listed below.

Providing a nesting habitat can be as easy as making a bee house. A bee house attracts cavity-nesting bees that use mud, leaves and other materials to create little rooms within structures with tunnels. A really simple bee house can be made by taking a portion of a log, drilling holes in it and hanging it in a sunny location. Another type of bee house uses stick bundles or canes that are put in a “house” structure.

For more information, visit www.beelab.umn.edu.

Flowers that are bee-friendly

Beardtounge

Lupine

Wild Geranium

Calico Aster

Lanceleaf Coreopsis

Goatsbeard

Stiff Goldenrod

Beebalm

Visit www.beelab.umn.edu for more information.

Easy ways to make a bee house

Some bees do not live in a hive, and are called solitary bees. They live on their own and build their own nest. A solitary bee collects her own nectar and pollen and lays eggs without help from other bees.

After planting bee-friendly plants and trees, it's time to add shelter for solitary bees. Some of the wild bees that will use the bee house include Mason bees, Leafcutter bees, Hoplitis, Yellow-faced bees, and Carder bees. There may be solitary wasps that use the bee house, too, but they are not as aggressive as the wasps that live in a colony and may make homes in tree cavities or create a paper wasp nest.

Bee houses should be between three and five feet from the ground. Locate the bee house on the eastern side of a tree or building so that they will receive the warm morning sun, but not the intense heat of the afternoon. Make sure there is a water source nearby. If ants or spiders start invading the bee house, brush them away and put petroleum jelly around the holes.

A Bundle of Sticks

Supplies needed:

- Canes of some sort: bamboo, reeds, hollow plant stems.
- Brightly colored yarn or duct tape
- An empty pop bottle, can, or

small bucket

- A saw
- A piece of wire or a drill

- Acrylic paint in bright blue and black

Begin by cutting the canes into segments just behind the nodes so that only one end is open. The length should be between five and eight inches, long

enough to fit in the container. Cut enough canes to fill the container being used.

Remove some of the filling with the wire or a small drill bit. The bees will clean out the rest.

Paint some of the front edges of the canes blue or black. Let dry. If using a can or bucket, paint the inside of it blue.

Bundle the canes and bind them together using the duct tape or yarn. A cane may need to be removed if the bundle becomes too thick. Remember, it has to fit back into the container. Insert the bundle into the container and hang it up.

A Block of Wood

Supplies needed:

- A section of tree or a block of untreated wood
- A drill and drill bits
- Paper to roll into straws or paper straws, optional

For both options, drill a variety of holes into the wood. The diameters of the holes should be from 1/8 inch to 1/2 inch. Depths of the holes can vary. Nothing needs to be exact.

If using a cross-section of a tree, after drilling the holes, hang or place the wood outside and wait for the bees to arrive.

If the wood used was untreated or a longer section of log, there is one additional step. After all the holes have been drilled, roll paper into straws to fit the holes. This makes it easy for the bees to see inside of the tunnel and keep it clean. It also makes it easy to replace them, keeping the tunnels in the bee house clean and free of germs. Once this is done, place it outside for the bees.

Lawn Care Without Pesticides

When a lawn is kept healthy, it is less likely to become diseased and full of weeds. It also means that pesticides do not need to be used.

A strong and healthy lawn will make it harder for weeds to develop a root system or from insects causing harm.

If the lawn appears to have a thatch build-up or if the soil is compacted, renting a lawn aerator can be beneficial. The tool removes small plugs of soil from the lawn and are deposited on top of the grass. The holes improve soil aeration and improve the root system. The plugs should be allowed to decompose naturally.

Early spring is a good time to reseed bare spots that may have been caused by winter

weather or pets. Be sure to use the right type of seed and plenty of it.

Once mowing season starts, check that the mower blades are sharp so the lawn is less susceptible to disease. Leave the grass clippings on the lawn and let them act as a fertilizer. Grass clippings can provide the equivalent of almost one application of fertilizer.

The best time of day to water the lawn is early in the day. Water about once a week and thoroughly, about one inch of water. Do not let your water run into the streets and down the storm drains. Also be aware of the sprinkling rules put in place by Joint Powers Water Board.

When there are a limited amount of weeds in the lawn, consider removing them by hand rather than using a herbicide. September is the best time of year to treat dandelions, plantain, creeping Charlie and other perennial broadleaf weeds.

Mow the grass to a height of 2.5 to 3 inches

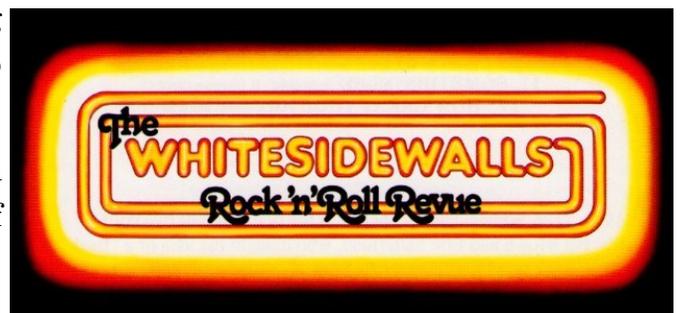

This is the single most important thing to do to keep a lawn healthy. By keeping a longer grass length, the roots grow deeper and can reach more water during dry periods. Longer grass also helps provide shade making it hard for weeds to grow.

Concert in the Park Welcomes The Whitesidewalls!

The Hanover Park Board is once again hosting The Whitesidewalls Rock 'n' Roll Revue for the annual Concert in the Park. The concert will be Thursday, June 29th in Settlers Park. It will begin at 6:30 pm so arrive early to stake a spot in the Park!

The concert is free of charge. Area residents will need to bring lawn chairs or a blanket for seating. Insect repellent is another item to bring in case it is needed. Residents are welcome to bring their own snacks and beverages.

This family-friendly concert will have everyone on their feet dancing to songs from the golden era of rock and roll and doo-wop music—1954 to 1964.

Anything that enters a storm drain goes to a local lake or river.

It does not go to a waste water treatment facility.

Do you know you live on waterfront property? You do if there is a storm drain nearby! Storm drains carry runoff water to local lakes and rivers.

Whatever washes off your yard and street can pollute these waters.

That includes lawn fertilizer, grass clippings, pet waste, and tree leaves and seeds—all sources of phosphorus, the plant nutrient that turns lakes and rivers green with algae.

Keep your runoff clean!

Keep our lakes and rivers clean!

REMOVE LEAVES FROM THE STREET

- Rake leaves, seeds and grass clippings out of the street and gutter.
- Compost on site, bag for collection, or take to community compost program.

LEAVES END UP IN THE STORM SEWER.....

PREVENT EROSION

- Phosphorus attaches to soil. Keep soil from washing into the street.

FERTILIZE THE LAWN, NOT THE LAKES AND RIVERS

- Choose a zero-phosphorus fertilizer. Many lawns have adequate soil phosphorus and will remain healthy without adding more.
- If you think your lawn needs phosphorus, test your soil first. For information call INFO-U at 612-624-2200, message 468, or visit soiltest.coafes.umn.edu.

FERTILIZER

LAWN AND PAVEMENT

STORM SEWER

LAKES AND RIVERS

- Sweep spilled fertilizer off paved surfaces.

- Remember, compost and manure contain phosphorus too.

CLEAN UP AFTER PETS

- Scoop the poop. Pet waste contains phosphorus as well as harmful bacteria.
- Don't feed the geese.

ANIMAL WASTES END UP IN THE STORM SEWER.....

GRASS CLIPPINGS END UP IN THE STORM SEWER.....

KEEP THE PAVEMENT CLEAN

Sweep up grass clippings, soil and fertilizer from driveways, sidewalks, and streets.

Take the Stormwater Runoff Challenge

Across

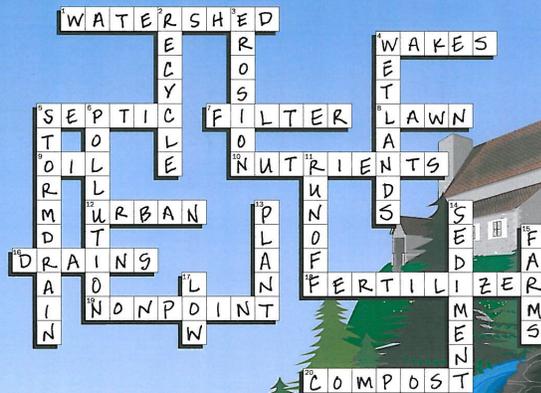

- The area of land that drains into an estuary, lake, stream, or groundwater is known as a _____.
- The _____ of speeding boats can erode shorelines.
- Maintaining your _____ tank will help to prevent bacteria and nutrients from leaching into groundwater and surface waters.
- Wetland plants act like a natural water _____, removing harmful pollutants from stormwater runoff.
- Leave your grass clippings on your _____ to reduce the need for commercial fertilizers.
- A single quart of motor _____, if disposed of improperly, can pollute 2 million gallons of water.
- Fertilizers and animal wastes contain _____ that "feed" algae and other aquatic plants harmful to water quality.
- Polluted runoff from both rural and _____ sources has a significant impact on water quality.
- Storm _____ don't always connect to sewage treatment plants, so runoff can flow directly to rivers, lakes, and coastal waters.
- Follow directions carefully when applying _____ on your lawn—more is not always better.
- Polluted runoff (also called _____ source pollution) comes from so many places that it's hard to "pinpoint" a source.
- Yard and vegetable food waste are suitable additions to a _____ pile.

Down

- Don't dump used motor oil into storm drains _____ it!
- _____ of soil from barren land can cloud nearby streams.
- _____ prevent flooding, improve water quality, and provide habitat for waterfowl, fish, and wildlife.
- Marking "Do Not Dump, Drains to Bay" on a _____ is one way to educate people about polluted runoff.
- Excess sediment, nutrients, toxics, and pathogens are all types of runoff _____.
- Polluted _____ is the nation's #1 water quality problem.
- The cattle is one wetland _____ that helps purify polluted runoff.
- Too much _____ in water can harm aquatic life.
- Proper crop and animal management on _____ helps to control water pollution.
- _____ impact development helps control stormwater pollution through conservation approaches and techniques.

Choices

- | | | |
|------------|-----------|-------------|
| compost | nonpoint | sediment |
| drains | nutrients | septic |
| erosion | oil | storm drain |
| farms | plant | urban |
| fertilizer | pollution | wakes |
| filter | recycle | watershed |
| lawn | runoff | wetlands |
| low | | |

Answer Key to last quarter's insert

Here are the answers to the December 2016 insert. How well did you do?

If they were all correct, you are on your way to becoming a Storm Drain Goalie!

For more information, please visit EPA's Polluted Runoff web site at www.epa.gov/nps

Printed with soy-based inks on recycled paper.

Wright County Law Day

On Monday, May 1, the Wright County Government Center in Buffalo will open its doors to the public as part of a Law Day celebration aimed at educating citizens about their local justice system. The event will give attendees the opportunity to take part in free legal advice clinics; attend presentations on emerging criminal justice issues; and learn how to reinstate their driver's license or resolve an outstanding warrant. The event will run from 9 a.m. to 3 p.m.

The Law Day event will feature numerous activities, including:

- Free legal advice clinics with volunteer attorneys to help individuals with civil and family law matters;
- Free clinics on the process of expunging criminal, juvenile, and housing court records. Volunteer attorneys will provide legal advice, assist with the completion of court forms, and work with court staff to set court dates.
- Presentations on important criminal justice issues, such as drug courts and other treatment court programs, common scams targeting local residents, and demonstrations of the Wright County Sheriff Department's K-9 unit.
- The ability for those with outstanding misdemeanor-level warrants to get free legal assistance and possibly resolve their case.
- A clinic for those who have had their driving privileges revoked, with staff from the Department of Public Safety's Driver and Vehicle Services division prepared to answer questions and provide information about how to get a driver's license reinstated.
- An information fair highlighting Wright County's justice partners and various legal services available in the community.

The Wright County event is scheduled to coincide with Law Day, a national day set aside to celebrate the rule of law. Law Day underscores how law and the legal process have contributed to the freedoms that all Americans share. Law Day was first established in 1958 through a proclamation by President Dwight D. Eisenhower. Congress passed a joint resolution designating May 1 as Law Day, U.S.A in 1961.

"Minnesota's justice system is recognized nationally for its innovation and effectiveness, and we have so much to be proud of here in Wright County," said Tenth Judicial District Judge Michele Davis, who is chambered in the Wright County Government Center. "This Law Day, as our country reflects on the importance of our legal system and the rule of law, we wanted to invite the public into the Government Center, so they can see first-hand how our community works together to keep our neighborhoods safe and our rights protected. We also wanted to focus on expanding access to justice, by offering free legal assistance and information for those that may need it."

The Law Day Open Courthouse event is being hosted by Minnesota's Tenth Judicial District in partnership with the Wright County Sheriff's Department, Wright County Attorney's Office, Wright County Court Services, Central Minnesota Legal Services, Wright County Public Defender's Office, Wright County Law Library, and Wright County Health and Human Services.

More information about the event, including a detailed event schedule, will be provided in the weeks ahead and will also be posted online at www.mncourts.gov/WrightCountyLawDay2017.

Wright County Law Day
